Post Construction Cleaning

What is Post Construction Cleaning?

Thoroughly cleaning and removing construction debris, dust and other materials left behind after a construction or renovation project. This guarantees that the constructed or remodeled area is pristine, clean and ready for the doors to open!

Post Construction cleaning involves three phases:

Rough clean: This initial phase removes large debris, trash, and excess materials.
· Dispose of construction materials such as wood scraps, nails, screws, and drywall pieces
· Remove protective coverings, tape, and plastic sheeting from surfaces
· Collect and dispose of any leftover paint cans, buckets, and tools
· Debris and Trash Removal

Detail clean: During this phase, the space is meticulously cleaned, including surfaces, fixtures, and appliances.
· Wipe down all hard surfaces, including countertops, cabinets, and shelves
· Clean windowsills, door frames, and baseboards
· Remove any stickers or labels from windows and glass surfaces
· Wipe down window frames and tracks
· Appliance and Fixture Cleaning
· Remove protective coverings and packaging from new appliances
· Wipe down and sanitize the exteriors and interiors of appliances, such as ovens, refrigerators, and dishwashers
· Dust and clean light fixtures, switches, and outlets

Final clean: The last phase ensures the area is spotless and ready for occupancy or inspection.
· Dust all surfaces, including walls, ceilings, light fixtures, and vents
· Vacuum carpets thoroughly to remove fine dust and debris
· Surface Cleaning
· Window and Glass Cleaning
· Clean windows, mirrors, and glass partitions using a squeegee and glass cleaner
· Sweep and mop hard floors, such as tile, hardwood, or laminate
· Polish and buff tile or stone floors if needed
· Bathroom and Kitchen Cleaning
· Clean and sanitize all fixtures, including sinks, toilets, tubs, and showers
· Wipe down and disinfect countertops, backsplashes, and cabinets
· Clean and polish faucets, handles, and other hardware
